

# Make up Lab Request

Students may attend no more than two make up labs each semester. There is no guarantee that there will be space in any particular lab section.

Fill this form out completely and give it and your homework to the TA before the start of the tutorial. It is up to the TA to decide whether you may join his or her lab. If the form is not correct, you may not get credit for the experiment. If you have scheduling problems contact the lab coordinator Carola Butler.
